ABOUT ME

Self-taught front-end developer skilled in building dynamic and responsive web pages using object-oriented programming.

EXPERIENCE

MotionPoint Corporation

Web Engineer

Coconut Creek, FL   Feb. 2019 - Mar. 2020

- Collaborated with PMs, QA analysts, and translation managers to bring projects to delivery within 30 days or maintain them post-delivery.
- Handled high tier client projects with tight delivery deadlines.
- Configured servers for new projects to ensure smooth translation process.
- Troubleshot and resolved business-critical systems which included managing performance, availability, latency, monitoring alerts and resolved connectivity issues.
- Managed performance, availability, latency, and monitoring of clients' translated websites.
- Debugged and resolved complex issues relating to the processing of code.
- Fixed layout misalignment caused by translation.
- Assisted clients during "go-live" testing to ensure proper functionality throughout the site.
- Worked alongside support team during on-call shifts to troubleshoot and fix clients' critical issues.
- Communicated with clients regularly for project updates.
